

Nicholas Genco

Senior Frontend Platform Engineer

Rocky Point, NY nickygencs@gmail.com 845-729-9778 [linkedin.com/in/nicholas-genco-6a8588a0](https://www.linkedin.com/in/nicholas-genco-6a8588a0) [nickygencs17.github.io](https://github.com/nickygencs17)

PROFILE

Senior frontend/platform engineer specializing in Enterprise UI modernization, reusable component libraries, accessibility, performance, and migration of legacy applications into maintainable Preact/React, TypeScript, Web Components, and Node.js systems. Selective consulting available for custom web apps, dashboards, and integrations where durable frontend architecture matters.

CORE SKILLS

Frontend Platform Architecture | Enterprise UI Modernization | Preact/React, TypeScript, Web Components | Design Systems | Accessibility | Performance Optimization | REST APIs | Node.js | ES6+ | Knockout/JET Migration

EXPERIENCE

Senior Member of Technical Staff | Oracle

Remote | August 2022 - Present

- Modernizing Oracle's enterprise UI ecosystem by migrating legacy Knockout/JET modules into TypeScript, ES6, and Preact Web Components that product teams can reuse with confidence.
- Delivered a reusable component library adopted by 20+ internal enterprise teams, reducing duplicated UI logic and accelerating consistent product delivery.
- Engineered high-performance client-side components for real-time data rendering, responsive interaction, and strict enterprise accessibility requirements.
- Partnered with architects and product teams on component APIs, migration strategy, testing patterns, and developer experience.

Member of Technical Staff | Oracle

Boston, MA / Remote | June 2020 - August 2022

- Refactored legacy UI systems into shared components aligned with scalable frontend architecture standards.
- Led interns through large JET/JavaScript-to-TypeScript migrations, improving type safety, maintainability, and onboarding for shared UI code.
- Partnered with UI architects to standardize reusable component patterns and internal design practices.

Software Engineer | Oracle

Boston, MA | March 2019 - June 2020

- Built accessible enterprise UI components from design review through production implementation.
- Implemented scalable UI enhancements and resolved production defects across customer-facing modules.
- Prototyped lazy-loading data providers later used in high-scale UI patterns.

Software Engineer | CAMP Systems International, Inc.

Ronkonkoma, NY | March 2018 - February 2019

- Developed front-end modules for aviation asset management platforms used by enterprise clients.
- Ensured compatibility across multiple hardware and third-party integrations. Tech: C#, Ext JS, ASP.NET, Oracle SQL.

Web Developer | Garment Printer Ink

North Port, NY | January 2018 - March 2018

- Built Magento and Joomla web modules, shipping/inventory databases, and AWS-backed e-commerce operations tooling.
- Tech: Magento, Joomla, JavaScript, CSS, AWS.

Software Engineer | Ibinex

New York, NY | September 2017 - December 2017

- Developed crypto liquidity, ERC-20 token, Angular, WebSocket, and REST API features for broker and trader tools.
- Tech: Blockchain, Angular 2, PHP, MySQL, Node.js.

EDUCATION

Stony Brook University | B.S., Computer Science

2018

SUNY Westchester | A.S., Computer Science

2015
